1	As per RFP, Last date for submission of bid through KPPP is 03-11-2025.	Requested to extend last date of bid submission up to 18-11-2025.	Last date of bid submission has been postponed to 10.11.2025.
2	In RFP page no 31, Bidder/ Consortium (all members cumulatively) shall have similar nature plant of capacity 20 TPD and is in operational.	Bidder/ Joint Venture (all members cumulatively) shall obtain Authorization from KSPCB/SPCB/PCC to establish processing plants and consent to operate (CTE/CFO/CTO) within 90 days from the date of Agreement.	Tender condition prevails
3	In RFP page no 31, Bidder Must Furnish Ownership of a processing facility with appropriate technology approved by KSPCB and proof of safe disposal arrangements.	Bidder/ Joint Venture (Any one of the JV Partner) shall have.	Tender condition prevails
4	In RFP page no 31, Bidder/ Consortium (all members cumulatively) shall have processed animal waste/slaughterhouse waste/carcass waste of Tonnes..... (50 percent of annual package waste) and produced by-products in any one financial year in last 5 financial years.	Bidder/ Consortium (all members cumulatively) shall have processed animal waste /slaughterhouse waste/carcass waste of ..... Tonnes (50 percent of annual package waste) and produced by products in any one financial year in last 5 financial years or shall have disposed 25 TPD Municipal solid waste scientifically under any ULB's Limit.	Refer Addendum-2
5	In RFP clause 2.4.2 (a) A Bidder may be a single entity or group of entities (the "Consortium"), coming together to implement the Assignment.	Requested to consider Joint venture instead of Consortium and limit to 3 numbers of JV members only. Any of the JV shall become the lead nember	Tender condition prevails
6	In RFP clause 2.4.2 (d): Authorizations from KSPCB/SPCB/PCC Must hold valid Consent to Establish and Consent to Operate (CTE/CFO/CTO) from PCR/PCC for waste processing rendering, Also, authorization under Solid Waste Management Rules, 2016 and Bio-Medical Waste Management Rules, 2016 (if applicable).	Authorization from KSPCB/SPCB/PCC to establish and consent to operate (CTE/CFO/CTO) shall obtain within 90 days from the date of Agreement.	In RFP, Page No 16, Clause 2.4, Eligibility of bidders, Sl No (f) it is mentioned that the bidder must hold valid Consent to Establish and Consent to Operate (CTE/CFO/CTO) from CPCB/KSPCB/SPCB/PCC for waste processing /rendering.

27	In RFP, page no 28 under the sub heading Bid Security it is mentioned that the bidder shall furnish 5% of the contract value per annum as performance security in the form of Bank Guarantee or FDR/TDR in lien to BSWML after issuance of LOA. The Performance Security to be kept valid throughout the Contract Period.	In this tender, there is no fixed contract value as the total amount depends on the number of shops and the quantity of waste generated, which has not been precisely quantified till date. Therefore, it is unclear on what basis the 5% bid security is to be calculated. Moreover, such a high bid security places an unnecessary financial burden on the bidders. Hence, to encourage wider participation and fair competition, we kindly request that the bid security requirement be either waived off or reduced to 2%.	Refer Addendum-2
28	In RFP, page no 31 it is mentioned that Bidder/ Consortium (all members cumulatively) shall have the experience in similar nature plant of capacity 20 TPD and is in operational.	As this is a newly introduced concept, very few agencies possess prior experience or capacity in this specific area. To encourage wider participation and ensure fair competition among eligible bidders, we kindly request that the qualifying requirement be relaxed and the minimum experience threshold be reduced to 5 TPD (tons per day). Such relaxation will enable more competent and technically qualified firms to participate, thereby fostering innovation and achieving better value	Refer Addendum-2
29	In RFP, page no 31 it is mentioned that Bidder/ Consortium (all members cumulatively) shall have processed animal waste/slaughterhouse waste/carcass waste of ..... Tonnes (50 percent of annual package waste) and produced by-products in any one financial year in last 5 financial years (as mentioned in the table below)	As this is a newly introduced concept, very few agencies possess prior experience or capacity in this specific area. To encourage wider participation and ensure fair competition among eligible bidders, we kindly request that the qualifying requirement be relaxed and the minimum experience threshold be reduced to 10%. Such relaxation will enable more competent and technically qualified firms to participate, thereby fostering innovation and achieving better value.	Refer Addendum-2
30	In RFP, page no 31 it is mentioned that The Bidder should furnish the details of animal waste received, processed and selling of By-products from/to any Government/Semi Government for at least one year in last five financial years preceding the Bid Due date.	As this is a newly introduced concept, it is understood that, apart from one company from Andhra Pradesh, no other company in India possesses experience in selling by-products to any Government or Semi-Government organization. Therefore, to ensure fair competition and provide equal opportunity to all eligible bidders, we kindly request that the qualifying criteria be relaxed to also include experience in selling by-products to private agencies. This will encourage wider participation and enable competent firms with relevant experience to take part in the bidding process.	Refer Addendum-2

31	In RFP, page no 33, Bidder shall demonstrate the operation and management of running plant/plants to BSWML officials before declaring Technically qualified, Bidder, who fails to demonstrate will be disqualified	We have been operating a poultry waste rendering plant successfully for the past four years, continuously adopting newer technologies and complying with all government statutory requirements, rules, and regulations. We now intend to establish a higher-capacity poultry waste rendering plant on our own land, incorporating the latest technologies and implementing new indigenous research processes. Our industry is currently in the process of shifting to this new facility. We are committed to providing the best possible services to the Government and the general public. Therefore, we kindly request you to include an appropriate corrigendum in the tender document, enabling us to participate in the tender bidding process.	Tender condition prevails
32	In RFP, page no 31, Bidder/Consortium (all members cumulatively shall have similar nature plant of capacity 20 TPD and is in operational. Bidder Must furnish ownership of a processing facility with appropriate technology approved by KSPCB and proof of safe disposal arrangements	As we have been running a 20 TPD capacity poultry waste rendering plant successfully for the past four years, we have found that operating continuously is quite challenging. Frequent machinery breakdowns occur due to continuous operation. If there were an alternative solution, such as a second rendering unit, we could process the full 20 TPD capacity without Interruption. Additionally, most of the poultry waste is collected late in the evening and transported at midnight to the nearby rendering unit. Processing the entire 20 TPD at once is therefore difficult, and much of the waste often becomes spoiled and unfit for processing. Hence, we would like to request that you incorporate a corrigendum in the tender, reducing the minimum processing capacity requirement to 10 TPD or less. This will allow multiple poultry rendering units to participate transparently in the bidding process, ensuring that all waste is processed as per KSPCB guidelines. This measure will also help prevent indiscriminate disposal of poultry waste within the city, ensuring that all collected waste is properly lifted and processed.	Refer Addendum-2

33	In RFP, page no 33, Valid CFO issued by KSPCB 1. If not submitted, bid will be rejected. 2. 35 points for 1 TPD capacity of plant. 3. 40 points for 1.5 TPD capacity of plants 4. 45 points for 2 TPD capacity of plant	As noted earlier, operating a 20 TPD processing plant is already quite challenging. Despite this, 45 points have been allotted for increased processing capacity, which is impractical, and lacks transparency. If smaller-capacity processing plants are ical, unscientific, established around the city, poultry waste can be processed in a more scientific manner, thereby minimizing public nuisance. Instead of awarding 45 marks based solely on the processing capacity of the rendering unit, it would be more appropriate to allocate marks based on factors such as research capability, availability of skilled manpower-including veterinarians, research officers, and environmental engineers-which would ensure smoother operations. Therefore, we kindly request you to issue an appropriate corrigendum regarding the capacity criteria of the rendering unit	Refer Addendum-2
34	As per RFP, Tenders must be submitted online through KPP portal on or before 03-11-2025 @4 PM. And the apening of tenders will be as per the KPPP portal guidelines	The document was uploaded to the E-Procurement portal late, and there are already a large number of documents that need to be collected and thoroughly verified. Therefore, we kindly request that the bid submission date be postponed by about 15 days from 03/11/2025 to 18/11/2025. This extension will allow more bidders to participate transparently, ensuring fair and healthy competition	Last date of bid submission has been postponed to 10.11.2025.
35	As per RFP, Tenders must be submitted online through KPP portal on or before 03-11 2025 @4 PM. And the opening of tenders will be as per the KPPP portal guidelines	Rather than awarding bid points primarily based on the processing capacity of the plant, it would be more appropriate to allocate points for the following criteria: The extent to which environmental impact is reduced through the adoption of ecor friendly measures Implementation of advanced and scientific I technologies. Research activities conducted and applied toward environmental sustainability Utilization of technically skilled manpower. Efforts made to protect the environment by controlling the release of noxious gases through the use of modern technologies.	Last date of bid submission has been postponed to 10.11.2025.
36	As per RFP, Pig waste and other big animal waste collection from the poultry shops	Most rendering processing plants are equipped to handle poultry, fish, chicken, and mutton waste. However, they do not have the capacity to process pig waste or large animal waste. Therefore, we kindly request that an appropriate corrigendum be Issued to specify that processing should be limited to fish, chicken, and mutton waste only.	Tender condition prevails
